Summary of StrataSync 16.1 changes

- General improvements / Bug fixes
- New test instrument support
- Supported browsers

General improvements / Bug fixes

Improvements

- The Analytics dashboard views now consider a user's 'Visibility Organization' instead of their 'Home Organization', allowing users to view dashboards defined at higher organizational levels than the organization they are directly associated with, as well as see test results data from the visibility organization and all sub-organizations as well.

New test instrument support

INX-700 Series

The INX-700 Series is now supported as a 'syncable' class asset type (with model INX-760) in StrataSync via syncing with the VIAVI Mobile Tech app. Please note that Mobile Tech version 5.3 is required for full support of the INX-700 Series.

- Supports asset information sync
- Supports template test configurations
- Supports upload of test data files
- Supports firmware deployment
- Supports Test Process Automation

TM400GB-QQ module for ONA-800

The TM400GB-QQ module is now supported as a 'module' class asset type in StrataSync via direct sync from the ONA-800 platform and syncing with the VIAVI Mobile Tech app.

- Supports asset information sync
- Supports template test configurations
- Supports upload of test data files
- Supports firmware deployment
- Supports deployment of instrument SW options

Supported browsers

StrataSync supports the following browsers. VIAVI recommends using the latest browser versions:

- Chrome
- Firefox
- Microsoft Edge
