Summary of StrataSync 17.5 changes

- Test Process Automation (TPA)
 - New features
 - New TPA job auto approval settings
 - New TPA job auto delete settings
 - Ability to unapprove a TPA job
 - Viewer for results from Manual and Scan test types
 - Enhancements
- General improvements / Bug fixes
- New test instrument support
 - CX200
- Supported browsers

Summary of Mobile Tech 5.7 changes

- New features
 - Updated look for Documentation
- General improvements / Bug fixes

NOTE:

Please clear your internet browser cache ('browsing history' and 'cached images and files'), prior to logging in to the StrataSync web UI after a new release.

StrataSync – Test Process Automation (TPA)

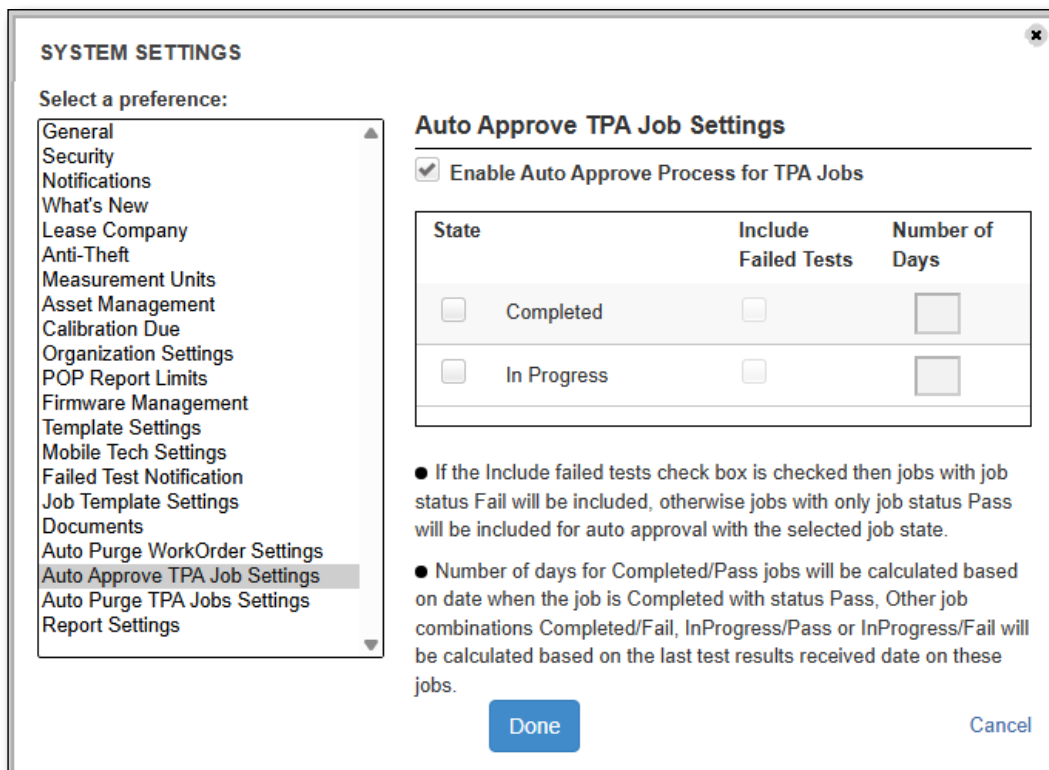

New features

Auto approve job settings

New settings to auto approve TPA jobs that are in either **Completed** or **In Progress** state, including ability to allow for failed tests, after a set number of days.

This automation will assist with minimizing technicians' list of jobs to only those that should still be open and require work.

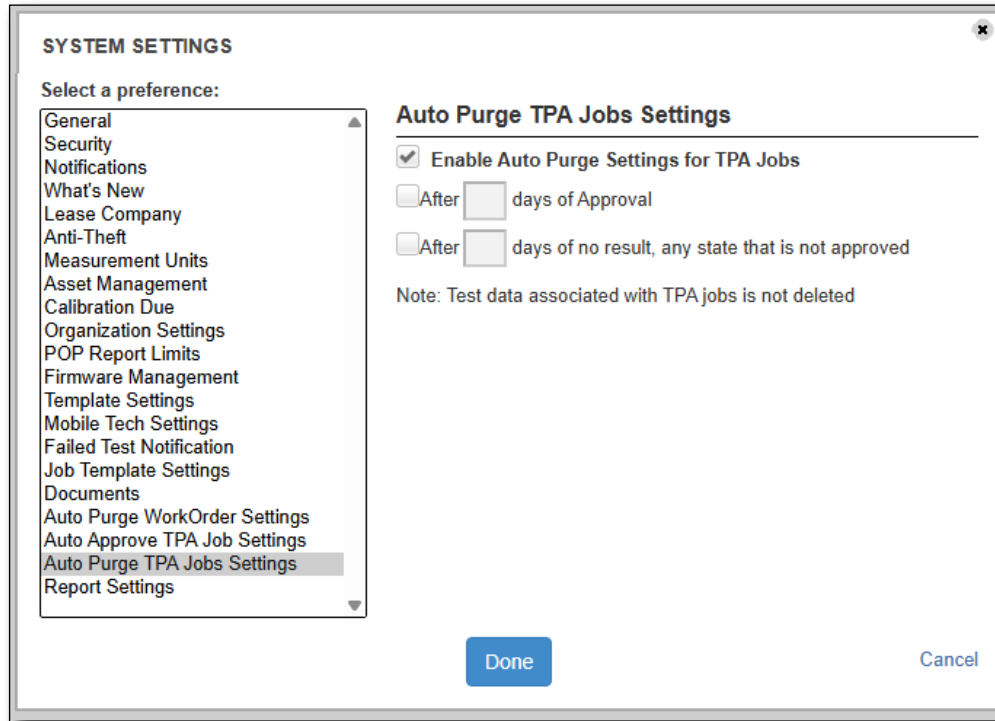

This feature requires a non-expired SS-PRO, SS-ANALYTICS or SS-ENT-WRKFLW subscription plan.

Auto purge TPA jobs settings

New settings to auto purge (delete) TPA jobs that are approved or have not received any test results after a given number of days. This automation assists with removing TPA jobs from the account that are no longer required.

This feature requires a non-expired SS-PRO, SS-ANALYTICS or SS-ENT-WRKFLW subscription plan.

Unapprove a TPA job

New feature to unapprove a TPA job which will return the TPA job state from **Approved** to either **In Progress** or **Completed** based on the tests that were previously completed.

This allows for new tests to be performed for that job in cases where they may have been failing previously or perhaps were not possible to complete previously.

This feature requires a non-expired SS-PRO, SS-ANALYTICS or SS-ENT-WRKFLW subscription plan.

Unapprove Job

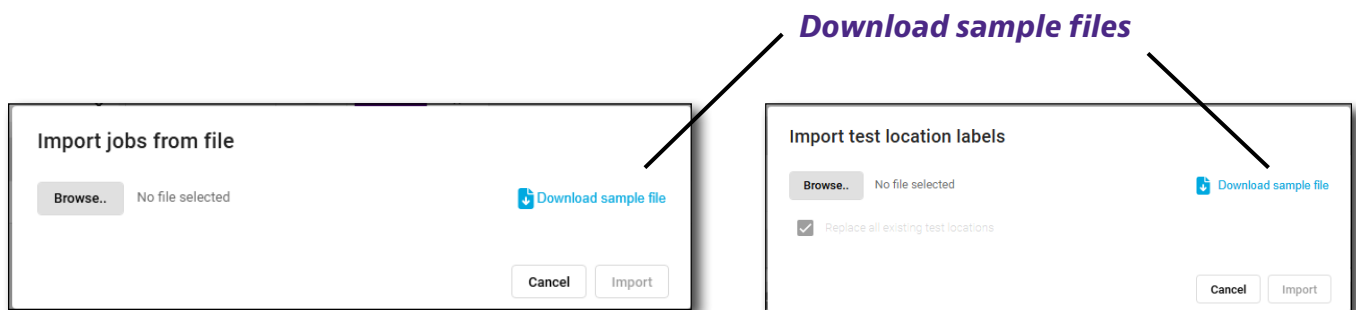

Viewer for results from Manual and Scan test types

Test results captured from Manual and Scan tests steps can now be viewed directly from TPA jobs or Test Data view.

Enhancements

- Enhanced TPA job reports to include report generation from multiple test types
- Enhanced TPA job report creation with error feedback
- Sample job import CSV now available in UI
- Sample test location label list CSV now available in UI

Importing jobs and test location labels

- Improvement to TPA job error resolution pop-up message

- Enhancement to **“Allow technician to edit or view configuration”** setting

This setting allows Mobile Tech app users to edit or view the configuration of a TPA test step.

It’s now more obvious in the UI after toggling this setting that it’s possible for a user to edit (pencil icon) all configurations.

Individual configurations can be changed to view (eye icon) or not visible (no icon) by clicking on the icon for each.

Editing configurations

- Support for AccountId now included in jobs and test data

General improvements / Bug fixes

- Removed "Set incoming job as the current job" setting
- Added a longer time period selection for floating license utilization reports
- Test plan view now line wraps in TPA jobs view
- Removed any additional visibilities from technician user roles and now prevent changing a user role to Technician role if user has additional visibilities set
- Added scroll bar to 'What's New' page so now all posts can be viewed

New test instrument support

CX200

The CX200 is now supported as a 'syncable' class asset type in StrataSync via direct sync.

- Supports asset information sync
- Supports template test configurations
- Supports upload of test data files
- Supports firmware deployment
- Supports deployment of instrument SW options

Supported browsers

StrataSync supports the following browsers. VIAVI recommends using the latest browser versions:

- Chrome
- Firefox
- Microsoft Edge

Mobile Tech

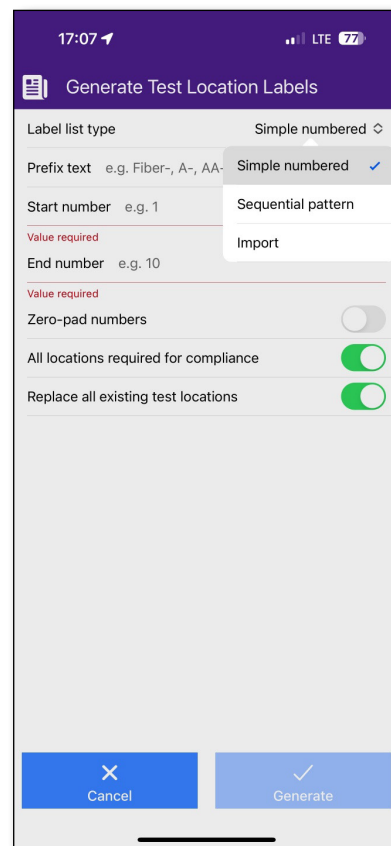

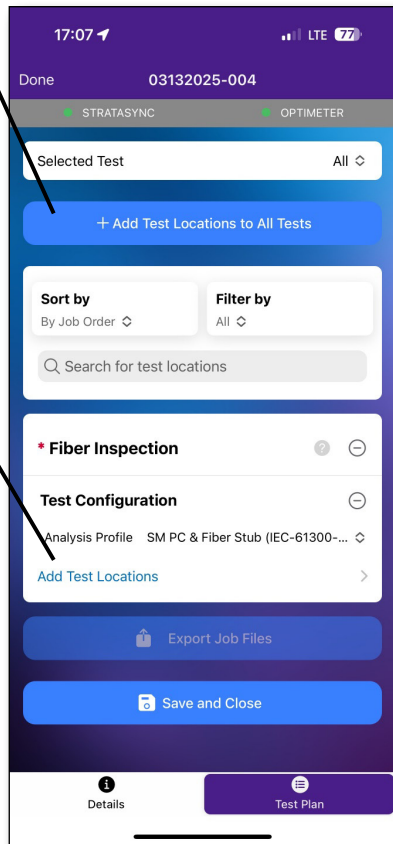

New features

Generate label lists for TPA jobs in the app

A new feature has been added to allow a Mobile Tech app user to auto-generate test locations across all tests or only to specific test steps.

Add labels for all tests

Add labels for specific test steps

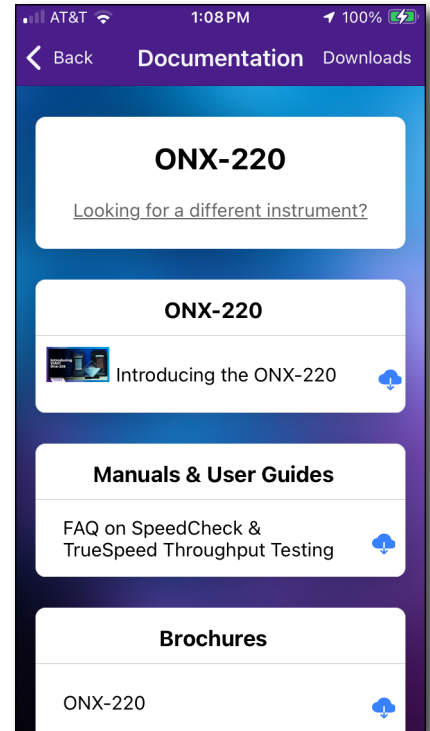

Adding test location labels

Updated look for Documentation

The Documentation section of the Mobile Tech app has been refreshed with a new UI.

Support for AccountId now included in jobs and test data

General improvements / Bug fixes

Improvements

- Saved results for Picture and Signature TPA test types now include JSON in addition to image file
- Improved support for very large amounts of test data
